

The Charge from our last meeting

1. Bring Muslim communities closer together
2. Increase Dawah and Understanding in the broader community
3. Greater engagement with “on the ground” needs of the broader community

The Problem: A snapshot of Delaware Valley Muslims....

- 66% live in Philadelphia
- 66% are African-American
- 60% live in or near poverty
- 25% have no health insurance
- Heart disease, diabetes, mental health, environmental and social problems are major issues for many local Muslims

The solution

- Muslims around the Delaware Valley work together to address community health needs
- Addressing basic health needs is a form of Dawah
- Working with the broader community increases understanding of Islam

**We will assist Al-Shifaa Health in
their Mobile Screenings Program for
underprivileged and under-served
of all faiths**

Al Shifaa -- a model we should support!

Al Shifaa -- a model we should support!

Current Challenges

- **More effective outreach**
- **More Primary Care Physicians**
- **Need Social workers**

How can you help?

- **Appoint a logistics volunteer:-**
- To organize and execute of the health screening at his/her location.
- **Marketing:-**

Each masjid will reach out to its community hand out already made flyers, make announcements, etc. to publicize the event.
- **Recruitment of primary doctors:-**

Each masjid will reach out to its community and recruit four primary doctors that will work along side the Temple students to conduct screenings.
- **Cultivate a local hospital:-**

Physicians from each community to reach out to it's local hospital for offering medical services.
